

Can be used in combination with all keyboards and computer mice

## Increases comfort and reduces tension!

Who says work must make you tired? Now you can work efficiently and comfortably without having to constantly think about your posture. With good support for your forearms you can significantly reduce muscle tension in your neck, back, arms and wrists.

### Relief and comfort

With an accessory tailored to gentler body movements, you can concentrate on your work. Through a forearm support you get effective relief and significantly reduce the tension in your entire upper body. Do you have a narrow workplace that makes it difficult to achieve an ergonomic working position? The support lets you extend small areas, so that you can work comfortably even where space is limited.

### Neutral posture for comfort

If you work a lot in front of the computer, it is important to try to maintain your neutral posture – but it is easy to forget when you focus on the work at hand. Now you can automatically maintain an ergonomic work position, keeping your wrist angle correct in relation to the keyboard whether you are sitting or standing when working.

### Lightweight and flexible

You quickly get help as the support is easy to attach and fits all types of desks with a thickness of 0.5 cm to 3 cm. To make it easier to keep your work area hygienic, it is also easy to disinfect with alcohol.

## Getting started

### Attach brackets

Turn the underarmsupport upside down on a flat surface. Loosely attach the brackets to the underarmsupport by using the thumb screw in the hole in the small arch in the bracket.

### Slide the underarmsupport onto desk

Slide your underarmsupport with brackets attached onto your desktop. Adjust placement as needed by sliding thumb screws up and down the metal track. Tighten slightly.

### Technical specifications

|                        |                               |
